Minister of Agriculture and and Deputy Ministers

Push Forward 'Innovative Agriculture for the Sustainability of Thai Farmers' Policy

Mr. Suriya Jungrunreangkit, Minister of Agriculture and Cooperatives, together with Ms. Piyarat Tiyapairat and Mr. Watcharaphon Khaokham, Deputy Ministers of Agriculture and Cooperatives paid respects to the sacred sites of the Ministry of Agriculture and Cooperatives (MOAC). In this occasion, the minister announced the advancement of the policy “Innovative Agriculture for the Sustainability of Thai Farmers” through five key policy pillars, including:

- The adoption of AI and Big Data to enhance productivity
- Increasing farmers’ income through high-value products and global standards
- Reskilling and upskilling farmers
- Implementing a market-led production supported by modern logistics system
- Smart water management to address droughts and floods.

In addition, a War Room will be established to monitor six urgent measures, including addressing high fertilizer costs (with plans to negotiate imports of 2 million tons from Russia), land allocation, developing a new generation of Smart Farmers, and systematically tackling PM2.5 pollution. These efforts aim to transform Thailand's agricultural sector toward precision agriculture while sustainably improving the quality of life for farmers across all groups.
