## Let's Ensure the Quality of Thai Durian

Enhancing value and strengthening consumer confidence through Thai durian export measures by upholding the “4 No’s” to guarantee quality:

- No unripe durians
- No worms
- No misuse of GAP certification
- No coloring or chemical residues

These measures aim to elevate the quality of Thai durians, build confidence among international buyers, reduce quality-related issues, and increase both product value and farmers’ income. The harvesting date for Monthong durian in Eastern region is set for April 20, 2026, with a required minimum dry matter content of 32%. Thai durian production in 2026 is forecast at approximately 2 million tons, with an estimated 1 million tons from the Eastern region.

Substandard durian can be reported via the hotline at +66 8 9245 6161.
